SAFARI CLUB INTERNATIONAL

METHOD 1 ENTRY FORM
For most animals with simple horns

I. Length of Horn
L \( \frac{1}{8} \) R \( \frac{1}{8} \)

II. Circumference of Horn at Base
In reedbucks, circumferences are for supplemental information only. Do not include in the total score.

III. Total Score \( \frac{1}{8} \)

Method 1-A
Use for duikers, dik-diks, pygmy antelopes

I. Length of Horn
L \( \frac{1}{16} \) R \( \frac{1}{16} \)

II. Circumference of Horn
L \( \frac{1}{16} \) R \( \frac{1}{16} \)

III. Total Score \( \frac{1}{16} \)

Method 1-B
Use for reedbucks
Only hard black horn may be measured. The softer pulpy material at the base of the horn must not be measured.

I. Length of Horn
L \( \frac{1}{8} \) R \( \frac{1}{8} \)

II. Total Score \( \frac{1}{8} \)

Supplemental Information
Circumference of Horn at Base \( \frac{1}{8} \) R \( \frac{1}{8} \)

Submit to: Safari Club International 4800 W. Gates Pass Rd., Tucson, AZ 85745 USA
Active SCI Membership Required to submit an entry
\( \square \) $35 R.B. Entry Fee (only for members who have never submitted an entry)

Guide _______________________________________

Hunting Co. ____________________________

SCI Record Book policy states that only the method of take used to kill the animal
should be recorded on the entry. If a firearm is used in conjunction with an alternative
method, the “rifle” category should be selected. For example, when taking alligator
with an alternative method, if a firearm or bang stick is used to deliver the coup de
gras, the method of take will be certified as a rifle entry.

I. Length of Body Including Tail ______ feet ______ 1/2 inch

Note: This field measurement must be taken with the crocodile and/or
alligator flat on the ground lying on its belly and must not be taken while
hanging. A field measurement taken while hanging may be asked to be
remeasured and/or may not be accepted by the SCI Record Book Committee.

METHOD 19-T

ENTRY FORM

For elk or wapiti with typical antlers (except Roosevelt Elk and Tule elk which are measured by Method 19-NT) Antlers that have one or more non-typical tines may be measured as typical at the owner’s request, but only the typical tines will count in the score. Any non-typical tines are to be recorded as supplemental information.

Please include 3 or more photos so that all tines are clearly visible.

II. Length of spur from base of spur
Left  ________ /16 inch x 10= _______ /16
Right ________ /16 inch x 10= _______ /16

Sub Total  _______ /16

Supplemental Information
Weight _________ lbs. _________ oz.

Measuring A Wild Turkey With Single Beard

All measurements on the Turkey are done in 1/16 increments. The SCI measuring system does not include the weight of the turkey when calculating the final score, weight can not be re-measured and therefore is listed as supplemental information.

Measuring the Spurs: Both the right and left spurs are measured. The measurement should begin at the center point of the spur that has been dissected off from the leg at a 90 degree angle to the base of the spur. Hold the cable tightly and continue measuring by following the curvature of the spur to the tip. This measurement can be taken from the left or right side of the spur where it joins the leg. The measurement will be multiplied by 10 to establish the total score of each spur.

Measuring the Beard: A beard must be measured from the base (thickest area attached to the chest) to the tip or longest feather in the beard. Use a multiplier of 2 (ex: 8-8/16 x 2 = a total score of 17) to receive the total score for the beard.

Add together the total points of the spurs, and length of the beard.
